

# The Ultimate NetSuite Integration Suite for Office 365

CloudExtend is a suite of apps that seamlessly integrates NetSuite with Office 365 and lets your users work with NetSuite from their favorite productivity tools: Excel, Outlook Mail & Calendar, SharePoint and OneDrive

# CloudExtend Outlook provides a 360° view of your customers for your teams working in NetSuite

## Easy File Attachment

Sync attachments to NetSuite file cabinet or OneDrive/SharePoint.

## Increase Organizational Transparency

Attach emails directly to NetSuite records to give your team more visibility.

## Streamline Approvals

Actionable Messages (approve time and expense reports directly in Outlook).

## Empower Users

Create and edit NetSuite records directly in Outlook.

## Instant Visibility

Surface relevant CRM and transaction data directly in Outlook with one click.

## Platform Agnostic

Works on Mac/PC/iOS/Android devices.

## CloudExtend Excel for NetSuite is a swiss army knife for your organization

## Reduce Manual Effort

No more exporting results to CSV files. Do it all in Excel with the CloudExtend data filters or leverage NetSuite saved searches.

## Leverage the Power of Excel

Use your existing spreadsheets with complex models and formulas to update data in NetSuite.

## Faster Updates

Upload multiple records to NetSuite directly from an Excel sheet. Bypass the NetSuite UI for faster data entry and updates.

## Gain Flexibility

CloudExtend Excel works on Mac & PC, so users can choose the computer and OS they prefer to work in.

## Eliminate Errors

Gain confidence that your data is valid in advance. End the vicious cycle of waiting for CSV uploads to run and hoping for the best.

## Security Integration

NetSuite admins can rest easy knowing that NetSuite permissions are enforced.
