

The Ultimate NetSuite Integration Suite for Office 365

CloudExtend offers a suite of apps that integrates NetSuite with Office 365 suite and lets your users work with NetSuite from their favorite productivity tools - Excel, Outlook Mail & Calendar, and OneDrive

360° view of your customers to your sales and support teams working in NetSuite with CloudExtend Outlook for NetSuite

Attach OneDrive for Business/Sharepoint online files & folders to NetSuite Records

Attach emails with 1-click to NetSuite records directly from Outlook

Actionable Messages (approve time and expense reports directly in Outlook)

Create and edit NetSuite records directly in Outlook

Surface relevant CRM and transaction data directly in Outlook with 1-click.

Works on Mac/PC/iOS/Android devices

A swiss army knife for your Operations and Accounting teams with CloudExtend Excel for NetSuite

Eliminate the hassle of exporting search results to CSV files. Do it all in Excel with the CloudExtend Excel data filter or leverage your own NetSuite saved searches.

Use your existing spreadsheets with complex models and formulas to update data into NetSuite

Upload multiple records to NetSuite directly from Excel sheet. Bypass the NetSuite UI for faster data entry and updates.

Let users choose the computer and OS they want. Works on Mac & PC

Know that your data is valid in advance. End the vicious cycle of waiting for CSV uploads to run, hoping for the best.

Auto-resolving picklists put an end to having to navigate between Excel and NetSuite to see a list of valid values.
