

A Complete Sync Solution for Your G Suite and NetSuite

Celigo CloudExtend G Suite™ for NetSuite enables true cloud-to-cloud synchronization of your Gmail, Calendar, and Drive within NetSuite records. CloudExtend for G Suite increases your efficiency by reducing manual effort and keeping both systems in sync. Built using NetSuite SuiteCloud technology, CloudExtend can be configured and working in as little as 30 minutes.

What CloudExtend G Suite Does for You

Important emails can now be shared outside of your mailbox giving co-workers a 360 degree view of activity in NetSuite.

See your events in whatever system you choose to work in.

With 1 click, you can attach your email to the suggested NetSuite record or search to attach to other records.

Get all the benefits of Google Drive directly in NetSuite by associating files and folders with NetSuite records, minimizing storage space.

With 1 click, you can view or edit your NetSuite records directly from within Gmail.

IT Admins can rest easy knowing the solution is tested for every NetSuite major release cycle.

¹ Consulting and personalized training is available for an additional fee.

“Celigo CloudExtend is an amazing product. The ability to save emails directly into NetSuite, without having to copy/paste anything is a massive time saver. Total setup takes about 10 minutes adding new users takes about 15 seconds. If you have Google Business Apps and you use NetSuite, Celigo CloudExtend is a must have.”
